

NZYMES OX-E-DROPS

WE GUARANTEE YOU WILL FEEL THE DIFFERENCE!

NZYMES™ Ox-E-Drops is a safe, stable compound that offers many **internal and topical uses**. **Ox-E-Drops** is a very powerful oxidizing substance which can act as a bactericide, virucide and fungicide. Internally it helps to release the precursors which assist the body in the removal of dangerous free radicals and toxins. **Ox-E-Drops** can help to increase the efficiency of certain enzymes called peroxidases which help fight foreign substances and enhance the immune system. **Ox-E-Drops** is very alkaline, and may help neutralize stomach acid. It helps to balance digestion and colon flora and may increase energy and endurance. **Common Uses:** Treat water by glass or by the gallon; Treat water in campers and motorhomes; Use for International travel; Use in vaporizers for respiratory problems; Use to disinfect and deodorize surfaces; Use as a 2% solution for eye drops or as a topical antiseptic.

GUIDELINES FOR INTERNAL USE

User Directions	Suggested Daily Usage
Adults	1 drop per 20 lbs. bodyweight twice daily
Children	1 drop per 20 lbs. bodyweight twice daily
Pets	1 drop per 20 lbs. bodyweight twice daily

DIRECTIONS FOR PEOPLE: Mix the **Ox-E-Drops concentrate** with 4-10 ozs. of water, coffee or tea; drink twice daily.

DIRECTIONS FOR PETS: Mix the drops with 1 teaspoon of water and **add to the pet's food twice daily**. We also suggest to add 2-3 drops in a pet's water dish each time it is filled-up, especially when traveling. **Small pets (5-10 lbs)** should receive a minimum of 2 drops twice daily.

GUIDELINES FOR TOPICAL USE PREPARING A 2% TOPICAL SOLUTION

Mix one (1) teaspoon (80 drops) of **Ox-E-Drops concentrate** with 8 ozs. (1 cup) of filtered water. Distilled water is preferred for ear or eye usage. Apply solution with a bandage, cotton ball/swab, spray bottle or eye-dropper for eyes. For most all topical purposes a diluted 2% solution is entirely adequate. **NOTE: Store mixture away from direct sunlight.**

PET EARS TOPICALLY: Saturate a cotton ball with the 2% solution and squeeze some of the solution into the ear, letting it trickle down. Gently wipe the ear canal dry. **PET EYES TOPICALLY:** Apply the diluted 2% solution 2-3 times daily with cotton ball or eye-dropper. **Do not use undiluted in eyes or ears.**

CUTS, ABRASIONS, BURNS, INFECTIONS, SKIN PROBLEMS, RASHES (i.e. cold sores, shingles, athlete's foot, eczema, psoriasis or hives). Apply a 2% solution to the affected area 3-5 times per day and allow to dry. Repeat until the area improves. A wet compress left on the area for 10-15 minutes is likely to be more effective. Skin problems like cold sores, shingles, etc. are surface manifestations of possible internal problems, so that the internal use of the **Ox-E-Drops** 3 times per day may aid in the therapeutic process.

Total immersion of the body in bath water containing 2 to 4 ozs. of **Ox-E-Drops** has a therapeutic effect. This has helped with Shanghai Flu, post-herpes neuralgic pain (shingles) and the alleviation of pain resulting from calcium deposits in the knee.

DENTAL ORAL HYGIENE

A 2% solution is recommended for brushing your teeth or as gargle. Place 10 drops in a cup with about 1 Oz. of water. Gargle the solution in your mouth for 1-2 minutes. This helps hold oral bacteria to a minimum, resulting in healthier teeth and gums.

COLDS, FLU, SORE THROAT OR COUGH

Often the flu or a cold begins with a sore throat or a tickle and cough. At the first sign, use a 2% solution as a gargle and repeat 4 or more times a day. **(GARGLE:)** Place 10 drops in a cup with about 1 oz. of water. Gargle the solution in your mouth for 1-2 minutes).

3 times a day, ingest a mixture of 10 drops of **Ox-E-Drops** in an 8 to 10 ounce glass of water. If symptoms persist, at bedtime, place 20 drops of **Ox-E-Drops** in a cup of hot tea and drink.

ALLERGIES AND SINUS PROBLEMS

Infectious agents can enter the system through the nose and lodge in the sinus area, and even settle in the lachrymal gland - So it can be helpful to use the 2% solution in a nasal sprayer 2-3 times daily.

PNEUMONIA AND RESPIRATORY PROBLEMS

(i.e. sinus congestion, breathing disorders, dog flu, kennel cough, sneezing, asthma, bronchitis, wheezing, bacterial infections).

IMPORTANT NOTE: Internal usage of **Ox-E-Drops Concentrate** should be increased to 3 times daily with all types of respiratory problems.

INSTRUCTIONS FOR USE AS AN INHALANT

USING A VAPORIZER: Mix 40 to 80 drops of **Ox-E-Drops Concentrate** with the one (1) gallon of water in a vaporizer. **NOTE:** Severe cases of may warrant the use of the full 80 drops, or even as much as a tablespoon when mixed with 1 gallon of water.

USING A NEBULIZER: Mix 7-8 DROPS of **Ox-E-Drops Concentrate** with each OUNCE of water in the nebulizer reservoir (reservoirs usually hold 2 ounces). **NOTE:** You can increase this slightly for more resistant cases (use 10 drops per OZ.)

Directions For People: (Option A): Place the vaporizer on the night stand next to your side the bed and breathe the vapors overnight. **(Option B):** Use a towel as a tent over the head with a steaming pan of water. The vapors should be inhaled into the lungs for 15 min. per hour and repeated each hour for 4-5 hours for a period of 2 to 3 days. **NOTE:** Use the 2% Ox-E-Drops solution in a nasal sprayer for sinuses.

Directions For Pets: Place the pet in a enclosed area like a small bathroom or kennel along with the vaporizer. With a kennel, use a towel to tent the top to make sure the vapors are directed so the pet can breathe them (avoid hot steam near their nose or face). Allow the pet to breath the vapors for 15-20 minutes of EACH HOUR for a period of 4-5 hours. Repeat the procedure for 2-3 days.

CANDIDA, LEAKY GUT & YEAST PROBLEMS

Adults: Work up to taking 10 drops 3 times a day. People who have an entrenched "Candida Infection" may feel flu-like symptoms or nausea or for several days as the body clears the toxins. If this occurs, reduce the amount taken to 1/2 and continue the procedure. If the yeast problem is in the vaginal area, make a 1% solution of **Ox-E-Drops** (1/2 tsp. with 8 oz. of water) and apply using as a douche several times a day. This slightly weaker solution is recommended for a sensitive area.

PET YEAST PROBLEMS AND TOPICAL SKIN ISSUES:

Give the correct internal amount of **Ox-E-Drops** 2-3 times daily and spray or wipe all the itchy, rashy or discolored skin areas 3-4 times a day with the 2% solution. Pets with this problem require the additional products as described in our online **Yeast-Kit-What to Do? instructions page**.

DIARRHEA OR INTESTINAL VIRUS: Take 10 drops of in a glass of water at least 3 times a day. If necessary, also do the "20 drops in hot tea" routine at bedtime. (Adjust quantities for small pets).

COLONIC FOR PEOPLE OR PETS: Dilute 7 to 15 drops of **Ox-E-Drops** with 1-2 tablespoons of distilled water for each 25 lbs. of bodyweight. Inject mixture into rectum with a syringe fitted with rubber tube.

FOOD POISONING - SALMONELLA OR E-COLI

Take 10 drops of **Ox-E-Drops** in 4-10 ounces of water every 1-3 hours until relief occurs.

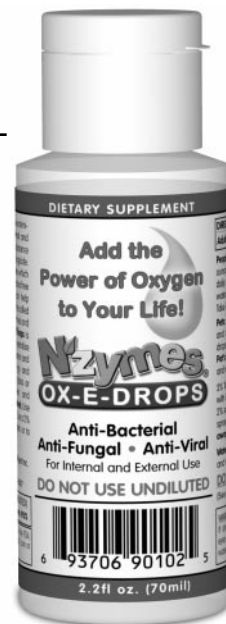

WATER DECONTAMINATION: To kill bacteria, viruses, and fungi in water, add 1-5 drops of **Ox-E-Drops** per gallon of water and do not use for at least 2 hours.

WARTS, NAIL FUNGUS, INSECT STINGS or BITES;

Carefully place 1-2 **UNDILUTED DROPS** on a **Q-tip** and then apply to the problem area and allow it to be absorbed in. Avoid contact with the surrounding skin. Do this 1-3 times daily until the condition has changed. See warning below.

DISINFECT AND DEODORIZE SURFACES: Use the 2% solution to spray and wipe surfaces, countertops, cutting boards, thrash cans, toilets, etc.

WARNING: The **Ox-E-Drops Concentrate** has a pH of 13 and can bleach fabrics. The use at full strength on the skin can cause a mild alkaline burn. If undiluted contact occurs for skin or eyes, flush the area with water. If swallowed in concentrate form, drink large amounts of water. (at least 1 quart to 1 gallon).

DOBBIN

Cirrhosis or the Liver

I am a 64 years young, outfitter from Colorado. I've always been in good health until I got sick in October of 1998. I became very weak and blew-up like a balloon. My wife took me to the hospital in a wheel chair and had to help me get up and down.

I was told my sodium level was so low it was affecting all of my internal organs and they were not functioning properly, especially my liver. I was told that I would have to be drained every few days to take the built-up fluids from my body. At that point, The doctor told my wife that if I lived through the night, I probably would not live through the week!

I was sent home after seven days, only to return; this time being much worse, and being carried in, as I was so weak! The doctors discussed putting a shunt into my liver or the possibility of a liver transplant. I was sent home again to wait for that possibility and they continued to drain the fluids every week.

A good friend heard of my illness and called, telling me to start taking **Ox-E-Drops** 3-times a day and don't stop. I took it in a cup of hot tea, faithfully, every day.

5 months later in February of 1999, three days before my next doctor appointment, and once again to be drained, my wife said, "Look! something's happening! Your stomach is going down and getting softer. I went to the doctor's appointment, and he looked at me in shock and remarked, "What did you do, you are well!"

Quoted by the doctor, from one day, to one week, to one year to live and yet I am still here! I honestly thought I would never ride a horse again. I truly believe, without **Ox-E-Drops**, I would not be alive and still operating my outfitting business. Thank you for Ox-E-Drops!

JANE

Diabetes - Cellulitis
Pain in legs - Dry skin

NZYMES® Ox-E-Drops product has helped me tremendously and made a significant difference in the quality of my life.

As a diabetic, I have to be very concerned about cuts and scrapes as healing is very difficult and can even lead to amputation. I had been suffering with a reoccurring systemic infection complicated by cellulitis (inflammation of the cellular tissue).

This condition caused my legs to have very low circulation and a great deal of pain and the skin on my legs had become very pasty and dry. The pain in my legs had made my life very difficult.

I began using **Ox-E-Drops** in January of 2000. Since then, I have gone from being bed ridden, to getting about in a wheelchair, then to a walker and now I am only using a cane, in just 4 months.

Twice a day I sprayed a 2% solution of Ox-E-Drops on my heel to irrigate the ulcer. It is very difficult for a diabetic ulcer to heal, however, I feel the **Ox-E-Drops** have accelerated the healing process in a short period of time.

I currently take 10 drops in water, twice a day orally, as well as irrigating my heal ulcer twice a day. I would recommend it for anyone who was diabetic with or without complications. I want to tell everyone that **NZYMES® Ox-E-Drops** have helped me tremendously.

JOYCE

Candida - Yeast Infections

Congratulations for making such a great product. I think **NZYMES® Ox-E-Drops** are terrific and worth their weight in gold. I have suffered yeast infections all my life. The problem was compounded by many surgeries.

I have been using **Ox-E-Drops** for over a year and it has solved my Candida problem. I have NOT had bronchitis or any viruses during the entire time I have been taking it. I hope I never have to go without **Ox-E-Drops**.

Joyce Felice, Reno, NV

MAUREEN - RN

Shingles - Bronchitis

I wanted to write you to express my delight at your product **Ox-E-Drops**. I have been an R.N. for nearly 30 years. A friend who swears that it saved his life told me about your product. It was reported to me **Ox-E-Drops** was an anti-viral, anti-bacterial and anti-fungal product. I must say, I was skeptical.

I contacted you and ordered right after my husband developed shingles. He started on them immediately at the dose recommended. (10 drops in water, 3 times per day).

When my husband showed me his lesions, I knew what they were and I agonized for him. I have seen many cases of shingles over the years. The patients describe the pain as excruciating. Normally patients have them anywhere from 6 months. to 2 yrs. and are in pain the entire time. Some have such severe pain that they have to have a local nerve block to get temporary relief. My husband's shingles were totally gone, lesions and all, after 7 days. The diagnosis was done by a dermatologist who specialized in skin problems to confirm the shingles.

Later, I developed a cold which turned into Bronchitis. This virus usually lasts 7 days and longer for bronchitis. After starting the **NZYMES® Ox-E-Drops**, the next day the fever was gone and the congestion gone after 3 more days. Both my husband and I swear by this and will never be without it. Now at the first sign of any viral infections, we start the **Ox-E-Drops** immediately.

The friend that told me about **Ox-E-Drops** had cirrhosis of the liver and the doctors gave him 2 weeks to live. Today, 3 years later, he has no signs of it. He is a hard working rancher. It is just amazing.

Maureen Bennett, RN.

MAGGIE - Great Dane

Conjunctivitis - (Eye Discharge & Infections)

Maggie, my Great Dane has suffered reoccurring eye irritations and infections from a lack of moisture from her tear ducts. For the past two years Maggie wakes up every morning with greenish discharge in her eyes, which requires cleaning, and the application of expensive eye ointment.

After trying a variety of antibiotics as well as holistic remedies, only to have this reoccur within a day or two, I decided to try the **NZYMES® Ox-E-Drops** as recommended by a friend.

I mixed a 2% solution of **Ox-E-Drops** (1 teaspoon in 8 oz. of distilled water) and put this solution in an eyedropper and washed her eyes out every morning. After 3 days, her eye infections and irritations have ceased. Now I only flush her eyes out a couple of times per week to manage this problem. She is obviously more comfortable now, and I highly recommend the **Ox-E-Drops** for eye infections and eye irritations since it has been highly effective in controlling this problem.

International Travel
Water and food protection

My first experience with the products made by **NZYMES®** came when I bought some **Antioxidant Treats** for 12-year-old Cocker Spaniel that has hip dysplasia. While placing a reorder, I mentioned to the people at **NZYMES®** that in two-weeks I would be taking a bus trip across Central Asia, called Stantrek 2000, with a group of 23 other people.

They told me about a special product they were introducing soon, **Ox-E-Drops**, which could help maintain my oxygen levels in the high altitude and protect me from bacterial infections or the "Montezuma's Revenge" experienced by many travelers who visit that part of the world.

As a test, in hopes of preparing a testimonial, and because there were radio and television reporters with our group, they said they would like send me enough **Ox-E-Drops** for the whole group to use during the three-week trip across Central Asia.

All they asked was to make sure to I instructed the others on how to take them with water everyday and how to use it sanitize topically.

Now here's where the story gets interesting. They sent me one 2-ounce bottle of **Ox-E-Drops** with my order of pet treats to start using everyday before I left. They shipped the bottles for the others in a box, and so I packed it in my luggage planning to distribute to the others upon our arrival. Well, wouldn't you know it, Air France lost the bag with the **Ox-E-Drops** in it! Thank heaven I packed the bottle they sent me in my carry-along bag. I used it in my water everyday and was very careful with my fruits and vegetables.

During this three-week trip, I was the only one that didn't get sick. In fact, I gained weight during the trip while everyone else lost as much as 32 pounds.

Before I left, the folks at **NZYMES®** told me I would not get sick during the trip. Just like they said, I DID NOT GET SICK! My travels varied from cities, deserts, and mountains, some as high as 15,000 feet. I never felt short of breath. I am a believer in **Ox-E-Drops** because they truly worked for me!

Chicken Pox - Viruses

My family has been using **Ox-E-Drops** for several years. We have had great success with colds, flu or whatever "bug" going around! Last spring, my two older children and I all had chicken pox. We used **Ox-E-Drops** orally and as a 2% topical spray directly on the pox, and we all had remarkably short recovering periods.

I believe that over the years, using **Ox-E-Drops** as treatment and as a preventative tool, we have avoided many illnesses. It's a must in anyone's arsenal against fighting bacteria and viruses in our world today.

W. J. - Spokane, Washington

MARC

Food Poisoning
E-coli - Salmonella

I'm a Veterinary Medical student at Oklahoma State University. I have been using **Ox-E-Drops** for myself and well

as my animals for over five (5) years.

About 3 years ago, my father was grilling hamburgers outside and it started raining. He removed the meat from the grill before they were done. The rest of the family finished cooking with the microwave, but not me, I was in a hurry. So, I wolved down two hamburgers that were partially raw and left. About 4 AM I woke up and was extremely sick from food poisoning, most likely e-coli or salmonella.

I quickly got out **Ox-E-Drops** and began taking 15 drops in 8 ounces of water about every hour. In about 3 hours the nausea was under control. I continued to take 15 drops every hour for 3 more hours. By noon I was feeling normal again. I recommend everyone have **Ox-E-Drops** at home to combat salmonella and e-coli for themselves and also for their pets.

Marc Campbell - Ripley, Oklahoma
