

ADD THE POWER OF OXYGEN TO YOUR LIFE!

OX-E-DROPS

USES FOR PETS AND PEOPLE

NZYMES® OX-E-Drops is a safe and stable compound of 5% Sodium Chlorite and Reverse Osmosis water that offers many uses. **OX-E-Drops** is naturally alkaline and the fluid is naturally clear or slightly yellow in appearance. **Uses:** **OX-E-Drops** may be used mixed with water by glass or gallon according to individual needs. Perfect for international travel.

WARNING: NEVER USE THE OX-E-DROPS CONCENTRATE UNDILUTED!

The **Ox-E-Drops Concentrate** has a pH of 13 and can bleach fabrics. Never use **Ox-E-Drops** at full strength on the skin as it can cause a mild alkaline burn similar to bleach, if left undiluted. If undiluted contact occurs for skin or eyes, flush the area with water. If swallowed in concentrate form, drink large amounts of water. (at least 1 quart to 1 gallon).

Ox-E-Drops for Pets

Directions: Used internally, give your pets 1 drop of the **Ox-E-Drops Concentrate** for each 20 lbs. of the pet's bodyweight **with a minimum of 2 drops used twice daily for smaller pets.** Dilute drops with a teaspoon or tablespoon of water and add to pet's daily diet or give orally using a syringe or dropper by squirting the mixture along your pet's teeth line to prevent choking.

Additionally: Add 2-3 drops in the pet's water dish each time it is filled, especially when traveling.

DIRECTIONS: Given Twice Daily

Pets: 1 drop per each 20 lbs of Bodyweight.

For Birds: Add 1 drop to the bird's water dish.

Note: For more complex issues, increase the internal usage to 3 times daily.

Ox-E-Drops for People

Directions: Mix 1 drop of the **Ox-E-Drops Concentrate** for each 20 lbs. of a person's bodyweight and **TAKE TWICE DAILY.**

Add the **Ox-E-Drops** to 4-10 oz. of filtered or distilled **water, coffee, tea or milk** and drink twice daily. Perfect for people of all ages.

Supplement Facts

Serving Size: 8 drops - Servings Per Container: 225*

Sodium Chlorite 5% †

Other Ingredients: Reverse Osmosis water

† Daily value not established.

* Based on a 160 lb. person

Note: For more complex issues, increase the internal usage to 3 times daily.

IMMUNE SUPPORT*

3 times a day, ingest the mixture of **Ox-E-Drops** in an 8-10 oz. glass of filtered water, coffee or tea. You may also, at bedtime, **place 20 drops of Ox-E-Drops in a cup of hot tea and drink.**

LARGE WATER CONTAINERS: Add 1-5 drops of **Ox-E-Drops** per gallon of water and wait for at least 2 hours before use.

INTESTINAL HEALTH*

Work up to taking the daily recommended amount 3 times a day. People may experience a Herzheimer effect for several days as the body clears toxins. If this occurs, reduce the amount taken by 1/2 for a few days.

You may also add 10 to 20 drops in a cup of hot tea at bedtime.

How to Make a Diluted 2% Solution

Mix one (1) teaspoon of **Ox-E-Drops Concentrate** and dilute it with 8 ounces (1 cup) of filtered or distilled water.

Keep mixture in a clean spray bottle for ease of use. Store away from direct sunlight.

Never use the **Ox-E-Drops Concentrate UNDILUTED**

WHY ARE NZYMES OX-E-DROPS SO EFFECTIVE?

Lets look at the chemistry involved with **NZYMES® Ox-E-Drops**. At the normal pH of the stomach, (pH 3-4) one can expect chlorine dioxide (NOT Free Chlorine) to be produced from the ingested chlorite ions. This transient phenomenon ultimately yeilds chlorite ions again, which are absorbed by the body, passed through the lower gastrointestinal tract, and finally excreted by the kidneys, aiding the body.

DO CHLORITE IONS INTERACT WITH ENZYMES? YES!

NZYMES® Ox-E-Drops involves utilization of chlorite by cells, particularly leukocytes, as a substrate to increase the efficiency of a group of enzymes known as peroxidases. These enzymes are an important component in the immune system since they are involved in the oxidation of foreign material.

International Travel with Water and food

My first experience with the products made by **NZYMES®** came when I bought some **Antioxidant Treats** for 12-year-old Cocker Spaniel that had poor joint health in the hip area. I mentioned to the people at **NZYMES®** that I would be taking a bus trip across Central Asia, called Stantrek 2000, with a group of 23 other people.

They told me about **NZYMES® Ox-E-Drops**, which promotes better oxygen efficiency to support digestive issues like "Montezuma's Revenge" experienced by many travelers throughout the world. They said they would like send me enough bottles of **Ox-E-Drops** for the whole group to use during the three-week trip across Central Asia. All they asked was to make sure to I instructed the others on how to take them with water everyday and how to use it topically.

Now here's where the story gets interesting. They sent me (1) one 2-ounce bottle of **Ox-E-Drops** with my order of pet treats to for me to start using everyday before I left. They shipped the bottles for the others in a box, and so I packed it in my luggage planning to distribute to the others upon our arrival. Well, wouldn't you know it, Air France lost the bag with the **Ox-E-Drops** in it! Thank heaven I packed the bottle they sent me in my carry-along bag. I used as directed it in my water everyday and was very careful with my fruits and vegetables.

During this three-week trip, I was the only one that didn't experience difficulties. In fact, I gained weight during the trip while everyone else lost as much as 32 pounds from their experiences.

Before I left, the folks at **NZYMES®** told me I would most likely not experience and difficulties like during the trip. Just like they said, I DID NOT! But, everyone else did! My travels varied from cities, deserts, and mountains, some as high as 15, 000 feet. I never felt short of breath. I am a believer in **Ox-E-Drops** because they truly worked for me! Don't take a trip without **Ox-E-Drops**.

Immune Health - Skin Health

I wanted to drop you a line to let you know how grateful I am that you introduced us to **NZYMES® Ox-E-Drops**. About 10 days ago, I was diagnosed with a poor immune system accompanied by blister-like skin eruptions. Needless to say, this did not make me very happy, since I had heard horror stories about the painfulness and duration of this ailment from friends and relatives.

However, we had some **NZYMES® Ox-E-Drops** on hand, and I thought I might as well put them to use to see if I could improve my prognosis! I increased my INTERNAL use to 3 times daily, and also sprayed the **Ox-E Topical** on the affected areas per the instructions.

Shortly after this, we ordered more **Ox-E-Drops**, I started putting cold compresses on the affected, using the **Topical Ox-E Topical** solution.

The discomfort was reduced immediately with the compresses. In addition, to my astonishment, they stopped spreading. In less than two weeks most of the symptoms were gone already. I am most happy to be able to engage in my regular activities without discomfort! Others have told me of what they experienced with this issue and it sounded quite severe. My friends are amazed that I could be so much better in just a few days. Thanks for sharing this product with us!

Digestive Health

I'm a Veterinary Medical student at Oklahoma State University. I have been using **Ox-E-Drops** for myself and well as my animals for over five years.

About 3 years ago, my father was grilling hamburgers outside and it started raining. He removed the meat from the grill before they were done. The rest of the family finished cooking with the microwave, but not me, I was in a hurry. So, I wolved down two hamburgers still partially raw and left. About 4 AM I woke up and was in extreme digestive upset from the undercooked meat.

I quickly got out **Ox-E-Drops** and began taking 15 drops in 8 ounces of water about every hour. In about 3 hours the discomfort was under control. I continued to take 15 drops every hour for 3 more hours. By noon I was feeling normal again. I recommend everyone have **Ox-E-Drops** on hand.

**SAILOR MOON - Great Dane**

Digestive Health, Nausea, Diarrhea

I just got a new blue puppy from France. Upon arrival she appeared very healthy and seemed to adjust to us fine. A couple of days after her arrival, I received an alarming e-mail from her breeder in France warning me that Sailor's recently took very ill.

As a general rule, I always use **NZYMES® Ox-E-Drops** in my pet's water bowl. I had been doing this from the very first day she was here. I also added the **NZYMES® Sprouted Granules** to her food.

The next day after receiving the e-mail from her breeder, Sailor took sick with the same symptoms as her sister in France had. She was vomiting and having diarrhea. I continued using **NZYMES® Ox-E-Drops** in her water. She was still drinking but she had stopped eating all together. But she was only sick a few days, and within a day she was back to eating and being to her old self. Amazingly she lost very little weight from this ordeal.

The sad part is her sister in France was not so fortunate and passed away from this immune system issue. I really believe I could have lost Sailor Moon if I had not started her right away on the **NZYMES® Ox-E-Drops** and **NZYMES® Sprouted Granules**. Thanks again.

FRIDAY - Persian

Urinary health, Skin health, Hair Loss

Whenever I leave town for more than 2 days, my Persian cat Friday starts to show evidence of stress, which affects her health. This is in spite of the fact that I have a dog/cat sitter staying with my animals. This time I was gone a week to a National dog show. When I returned my cat had exhibited poor urinary and skin health problems. She had licked the area to the point that she had almost removed all of the hair from an area about the size of my hand on both of her sides.

Normally, the I go to the vet for but because of my previous experience with using **NZYMES® Ox-E-Drops**, I decided to try using the **Ox-E-Drops** on my cat, I put it in her water, diluted on her food and sprayed on her affected area of her sides with the **2% Ox-E-Topical**.

Within two days, her condition was back to normal and she stopped itching and licking her side. The redness in the skin was gone and beginning to recover.

She is now returned to normal without medications. I am thrilled I don't have to take her to the vet again for this stressed induced physical problem when it can be handled so well by a simple product like **NZYMES® Ox-E-Drops**.

I know of so many great uses for the **Ox-E-Drops**, but I had no idea that it would work for my cat's problems, but it was a great alternative.

**DIESEL - Great Dane**

Digestive health

I send out a "Big Thank You" to Lyn Richards (doglogic.com) and others of you who reinforced her recommendation of pet food and **NZYMES® Antioxidant Treats** for Diesel.

There's not a morning that goes by as Diesel is crunching his **NZYMES®** treat that I don't marvel at both the extent of the change and how rapidly it occurred. I no longer need to check the scale every week to verify Diesel's weight gain. He's started to fill out and amass some bulk to support his now 33"+ height as he approaches 9 months of age.

Overall, there's a visible difference in his energy level, the enthusiasm of his play and the daily zoomies. We have become so conditioned to worry about his digestive health, that we still pay too much attention to it - but now we celebrate how easy it is to scoop! LOL

I was impressed when the **NZYMES®** company called me and recommended several things but suggested that in addition to the **NZYMES® Antioxidant Treats** that I give Diesel **NZYMES® Ox-E-Drops** to help support good digestive health.

I'd been giving Diesel pumpkin to settle his stomach, but I stopped before starting him on the new regimen of **NZYMES® Antioxidant Treats and NZYMES® Ox-E-Drops**. So, I was able to give these new products full credit for any changes. Within a couple of days his stool changed dramatically. True to all the documentation about the products. Again, thanks to everyone and for those of you who are dealing with digestive health problems.

J. Kafka Smith - Elkridge, MD.
